FULL SERVICE ALLOY WHEEL REPAIR IN FORT MYERS

Offering custom powder coating, rim straightening, polishing, tires, replacement OEM and aftermarket wheels

(239) 313-7799

Gulf Coast Wheel Repair was founded in late 2018 and has made a substantial investment into the highest quality state of the art equipment specializing in all types of automotive wheel or rim repair. We are a true one stop shop and can restore your wheels back to new whether they are diamond cut (machined), polished aluminum, painted (powder coated) finish or just need to be straightened. All work is performed in house to speed turn around and control quality. We have a comfortable waiting room with wi-fi should you need to wait with the vehicle for a bent wheel repair. If a wheel is not safe or cost effective to repair we offer new, used and reconditioned replacement options, usually next day. Quality and customer satisfaction is our #1 concern. Check out our services page for more details and pricing.

INSIDE THE SHOP

Frontside Bend Repair

A patented straightening machine is used to apply hydraulic force to correct bends on the face of the wheel.

Backside Bend Repair

The same machine uses hydraulic force via dollies to correct common backside bends.

Powder Coating/Wheel Refinishing

Your wheels come from the factory with powder clear coat due to durability. We make sure that your wheel leaves with this important protection.
