Welcome to The Caves® II. The Caves II came to be after the quick sell out of The Caves® located right next door. Customer demand for such more Caves® warranted the Caves® II. The Caves II is a gated community of 43 Caves®, offered in many sizes to fit each Cave Dweller's needs. There are 3 basic styles, those for smaller needs like motorcycles or a single we have The Cave, offered with about an 14'+/- ceiling height, and The Cavern® that will accommodate RVs, multiple cars, boats and just about anything you can fit through the large OH door and finally, two Castles that have the ability to store many motorized vehicles, tool boxes and equipment. Caves® are planned to allow for a loft area above that can be built at construction or added later. Custom design, layout and Caves® can be purchased creating a much larger unit accommodating a larger collection.
